

Series CLR Voice Alarm

Description:

The Series CLR Voice Alarm sets the standard for speech quality audibles. The Series CLR can be used in many applications where normal tone alarms are simply unable to convey sufficient information. The simplicity of these single message units allows them to operate in multiples on regular alarm circuits without the need for separate synchronizing units.

Standard Message: Attention. Attention. This alarm has been activated. Please take appropriate action.

Nominal Voltage:	18 - 30VDC
Current Consumption (tone dependant):	20mA (average)
Sound Output (tone dependant):	102dB (tone), 100dB (speech)
Alarm Tones:	1
IP Rating:	IP54 w/ shallow base, IP65 w/ deep base
